OpenNexa.net

WEDDING PLANNER / CUSTOMER DOWNLOAD GUIDE

Your wedding. *Beautifully organized.*

Thank you for choosing OpenNexa Wedding Planner. Download the app, activate your unique license, and make your first plan.

DOWNLOAD FOR WINDOWS

opennexa.net/download/wedding-planner

Version 1.2.1 | Windows x64 | 111 MB | English interface

01 Download and install

Open this PDF on your Windows PC. Click the download button, save the .exe installer, and follow the setup prompts. This release has been tested on Windows 11.

02 Activate your license

Connect to the internet, open Wedding Planner, and enter the unique license key issued to you. Etsy customers receive their key separately through Etsy Messages. The download does not include a license key.

03 Make the day yours

Enter your wedding names, date, venue, budget, and currency. Start with the sample checklist, then add your guests, expenses, vendors, and timeline activities.

Need help or waiting for your key? Email support@opennexa.net or contact the seller through your Etsy order.

A little peace of mind.

KEEP THIS GUIDE FOR LATER

Your license and internet connection

One license activates one computer. Internet is required for first activation and license verification at least every seven days. You can plan offline between successful checks. If a required check cannot complete, reconnect to unlock planning features; your saved wedding records are retained. Contact support before moving your license to another PC.

Your plans stay on your computer

The app saves changes automatically in your Windows user application data folder, separate from the installation folder. No app account is required, and wedding records are not stored in a cloud database. The current version manages one wedding per dataset.

Keep a backup

Open Settings and choose Export Backup. Keep a copy in a safe location and make another before important changes or moving computers. Restore Backup checks the file and asks for confirmation before replacing your current dataset.

Export and share

Export Guests and Budget as CSV. Save or print your Checklist and Wedding Day Timeline as PDF. These exports help you share plans with the people involved in your day.

About Windows publisher warnings

The current installer is unsigned, so Windows may show an unknown-publisher warning. Confirm the download came from the official page below. Do not disable your security software. If you are unsure, contact support before installing.
